# **A WEBSITE IN HEALTH CARE SECTOR WHICH HAS TWO MAIN PURPOSES:**

**PROVIDES A LINKED  
CARD FOR EMERGENCY  
SITUATIONS.**

**PROVIDES EASY  
ACCESSIBILITY AND  
MANAGEABILITY OF  
MEDICAL DOCUMENTS  
TO USER.**

# PROBLEMS AND SOLUTIONS

## PROBLEMS

- Many a times in emergency situations we are alone and the people who try to help us have very little to no knowledge about our health and problems.
- Doctor requires basic knowledge about a person before they can operate/treat the patient, which the patients cannot provide immediately.

## SOLUTIONS

- We provide a PVC card that has a QR code/User account number which on scanning opens our website with basic details like blood group, allergies and medications he/she is on along with emergency contact details.

# PROBLEMS AND SOLUTIONS

## PROBLEMS

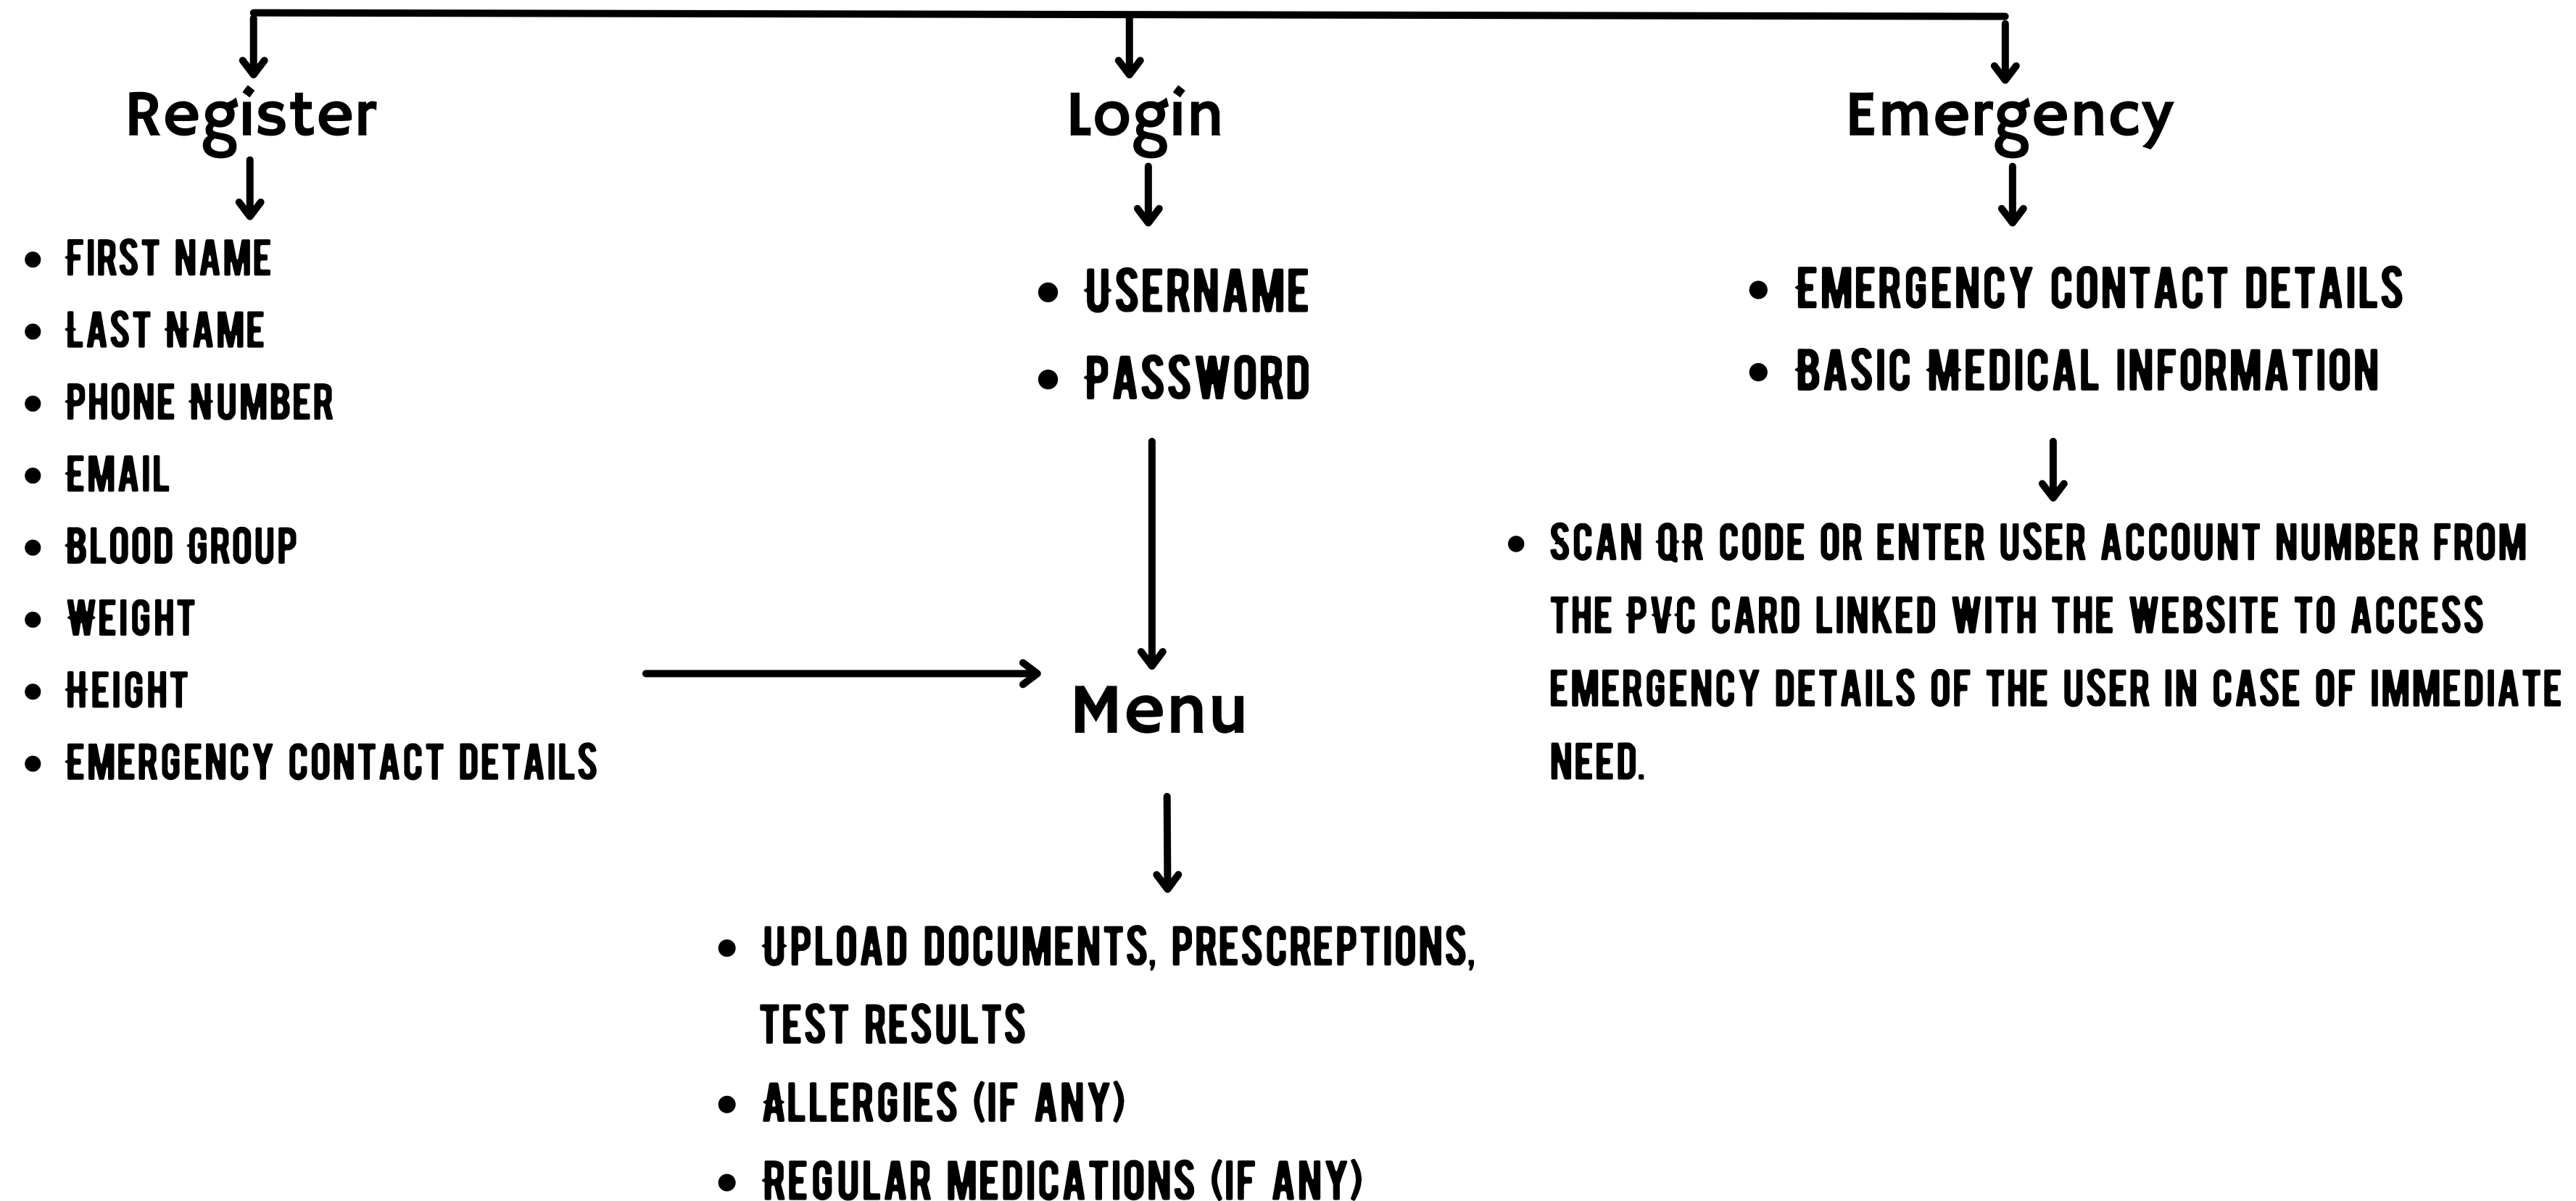

- Sometimes one ends up losing/misplacing his/her important prescriptions/documents.
- Also one can forget them at their home or in another city .

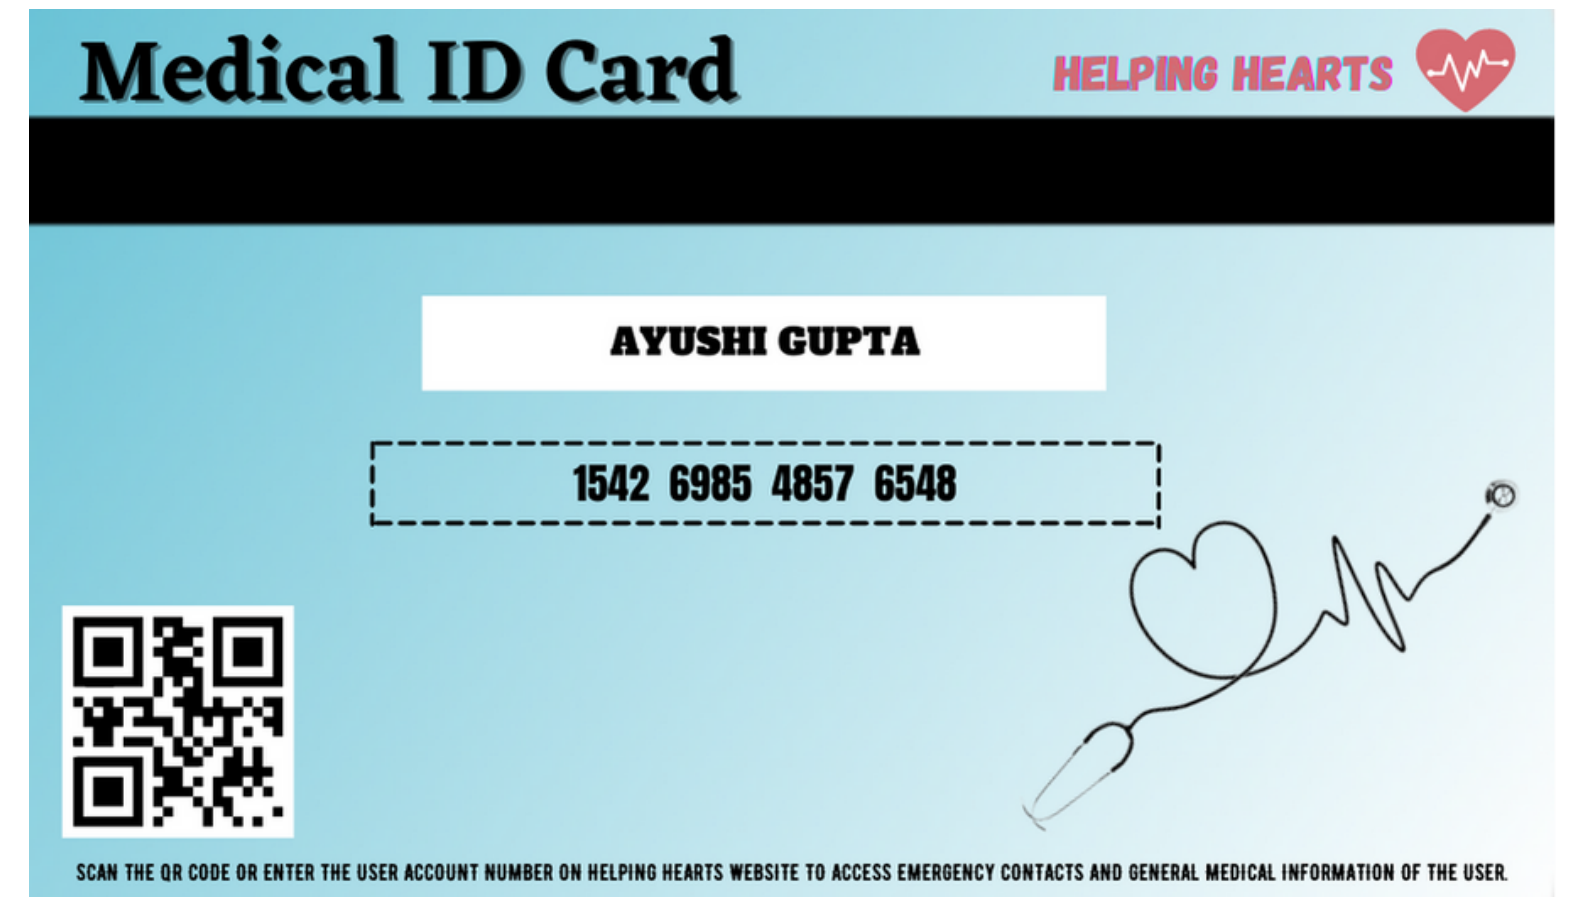

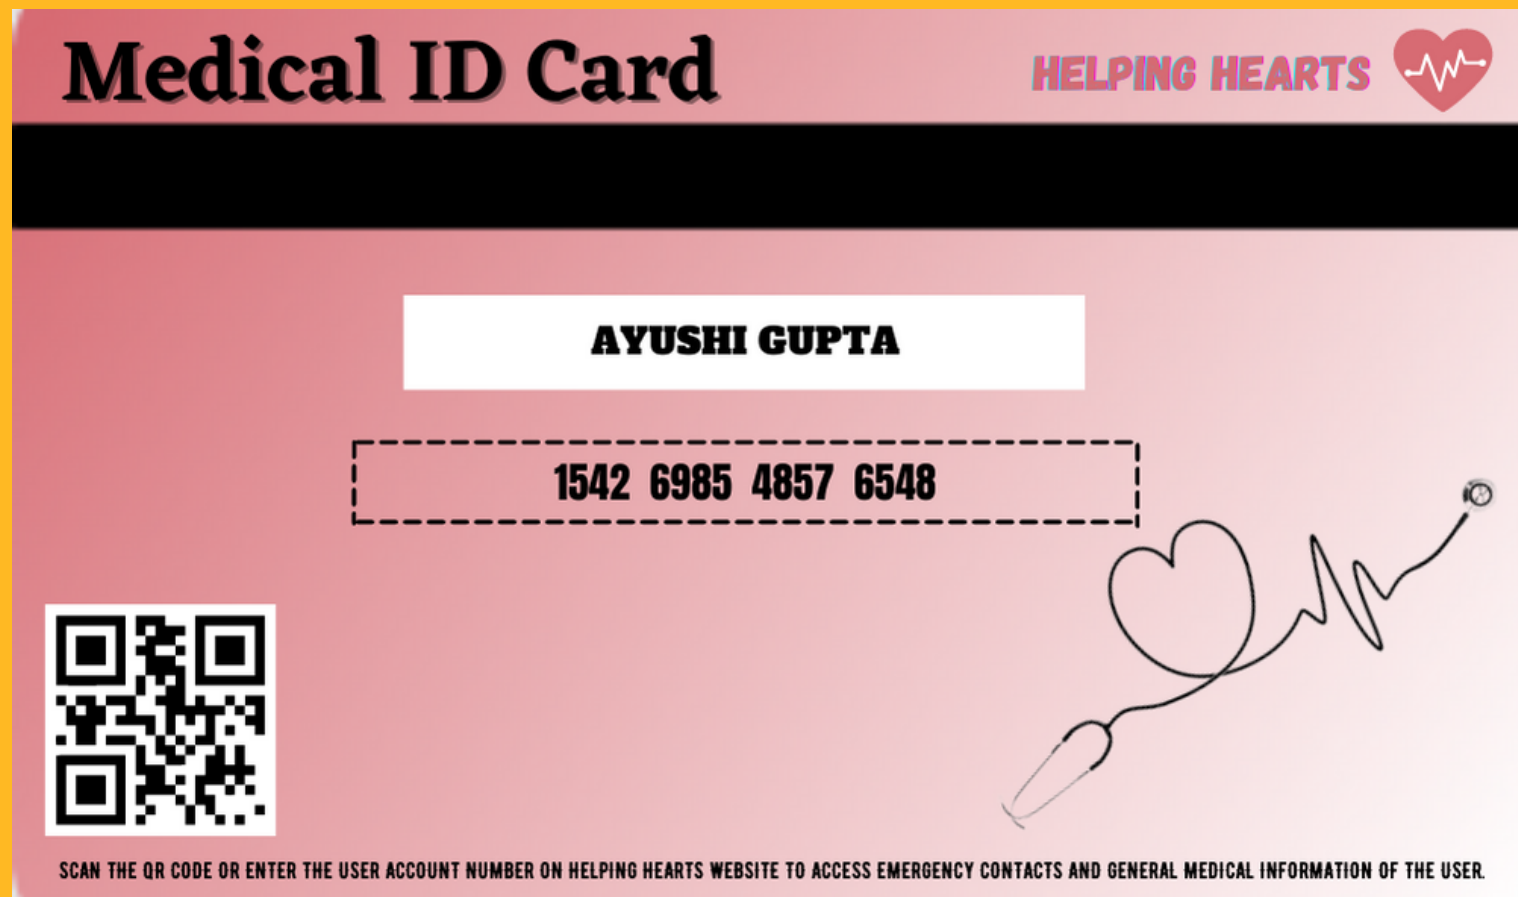

## SOLUTIONS

- 
- Our website allows you to upload your medical documents, details and prescriptions .
  - We also provide an ease of access and management of these documents and details.
